LIFTGATOR XTR

For Pickups, Service Bodies & Flatbeds

The LiftGator XTR is a portable liftgate system that can be attached to most pickup, flatbed, utility or service trucks equipped with 2-inch or 2 ½-inch hitch receivers. Installation takes less than three minutes. LiftGator XTR gives truck owners the flexibility to install and use a 1,300-pound-capacity liftgate when necessary, and to remove and store it when not needed. No truck modifications are required, and the vehicle can be driven with the liftgate attached.

XTR 50EA PS

- Truck applications
- 1,300 lbs capacity
- 50" extruded aluminum platform
- Electric powered stabilizers

XTR 50EA M

- Truck applications
- 1,300 lbs capacity
- 50" extruded aluminum platform
- Manual stabilizers

XTR 34EA M

- Truck applications
- 1,300 lbs capacity
- 34" extruded aluminum platform
- Manual stabilizers

XTR 48A M

- Truck applications
- 1,200 lbs capacity
- 48" diamond plate platform
- Manual stabilizers

LIFTGATOR VLG

For Commercial Vans

The LiftGator VLG is the industry leading liftgate for commercial van applications. The VLG is more cost effective, easier to use, and lower maintenance than any other liftgate available for commercial vans.

VLG 50EA PS

- Commercial Van applications
- 1,300 lbs capacity
- 50" extruded aluminum platform
- Electric powered stabilizers

VLG 50EA M

- Commercial Van applications
- 1,300 lbs capacity
- 50" extruded aluminum platform
- Manual stabilizers

LOAD TRUCK & RAISE THE PLATFORM

Using a Liftgator **VLG**

INSERT INTO THE HITCH RECEIVER

FOLD FRAME DOWN & OPEN DOORS

LOWER SUPPORTS & UNFOLD PLATFORM

LOWER PLATFORM TO THE GROUND

How does a LiftGator attach to a vehicle?

A LiftGator is simply rolled to the back of the vehicle on the provided wheels and slid into the hitch receiver. A LiftGator can be easily attached to the vehicle in less than three minutes. See a video at www.liftgator.com/instructionalvideo

How is a LiftGator powered?

A LiftGator is powered by a self-contained battery system within the lift gate which is recharged by the truck's 7-pin connector or built in 110v charger.

What is the difference between the XTR and the VLG?

The XTR is for truck applications, the VLG is for commercial vans. A VLG features a fold away frame system, which allows the van doors to be opened when the frame is folded down. The XTR features a fixed vertical rail frame.

Can I use a VLG on a truck?

Yes, a VLG is compatible with both vans and trucks.

How do I know if a LiftGator will fit my vehicle?

A LiftGator will fit either a 2" or 2 1/2" hitch receiver. The two important measurements are; from the ground to the top of hitch receiver, which must be 24" or less, and the top of the hitch receiver to the bed of the vehicle, which must be 24" or less.

What is the difference in a "-M" model and a "-PS"?

"-M" model designates a lift gate with manual stabilizers. A "-PS" designates a lift gate with electric powered stabilizers. Manual stabilizers have a drop pin to bring the foot down and a hand crank for a fine adjustment. Electric stabilizers are actuated by a control switch on the side of the upright rail.

Does a LiftGator wobble while driving around?

No, a LiftGator rides securely on the vehicle when the provided hitch stabilizer is tightened.

How does a LiftGator ship to me?

A LiftGator will arrive in a crate. All you have to do is take it out of the crate, roll it up to the back of your vehicle and insert it into your hitch receiver.

Does a LiftGator come with a warranty?

Yes, a LiftGator comes with a full 1-year warranty covering structural, mechanical, and electrical systems.

Where is a LiftGator made?

Each LiftGator is produced by experienced fabricators in Mt. Pleasant, TX. Steel and Aluminum are sourced from American mills to ensure the highest quality.

What our Customers are saying...

"It works fantastic! My dad was able to go out and pick up a snowblower by himself, no ramps or pushing needed."

– Kirk, All & Awill Repair

"While working alone, unloading material and tools from my truck was always a concern. With a LiftGator, I don't have to worry."

– Thomas, Ramirez Custom Construction

"Safety is a priority with everything we do, For us the LiftGator is really a no brainer."

– Dave, Bay Area Rapid Transit

"I am able to deliver fertilizer to our customers right when they need it, without having to schedule a delivery truck."

– Keith, Watson Ag Services

2059 CR 3210, Mt. Pleasant, TX 75455
